A-Project:

Ankara-Nigde Motorway Project

Exporter: Sauerwein & Schaefer Bau (SSB AG), different sub-suppliers

Ankara-Nigde Motorway Project (ANM) is a key national transportation project planned and developed by the Turkish General Directorate of Highways. The project will be implemented through a build-operate-transfer model.

The Motorway will cross the provinces of Ankara, Aksaray, Konya, Kirsehir, Nevsehir and Nigde, which are located in Central Anatolia. The project is proposed to be a dual carriage way of 2x4 lanes in the first 30 km part of the main route, and 2x3 lanes for the remaining part, with a total length of approximately 330 km including the main route and the connection roads.

The Swiss exporters will provide engineering, design works, goods and equipment for the motorway construction.
