A-Project: JBF Industries, 1500 tpd polyethylene terephthalate (PET) production plant, Geel – Laakdal, Belgium

Exporter: Uhde Inventa Fischer AG

JBJ industries is a manufacturers of polyester chips. JBF is to build a new 1500 tonne per day polyethylene terephthalate (PET) production unit in Geel, Belgium. The factory will be located on BP's existing Petrochemicals complex in Geel, adjacent to BP's world-class Purified Terephthalic Acid (PTA) facility.

The new plant will comprise two independent lines. Swiss Exporter Uhde Inventa Fischer AG will supply the equipment based on its Melt-to-Resin ("MTR") technology. The MTR process is characterized by lower costs for energy, capital investment and operations, leading to an overall reduction of conversion costs of about 30% compared to the traditional solid-stating process. Startup of the unit is scheduled in 2014
