### **A-Project: CELSE - Centrais Elétricas de Sergipe S.A.**

#### **Porto de Sergipe I Thermoelectric Complex**

**Exporter: GE Global Parts & Products GmbH, Baden**

The Porto de Sergipe I Thermoelectric Complex will be implemented in Brazil, in the city of Barra dos Coqueiros, state of Sergipe, a municipality next to the capital, Aracaju. This project is composed of three main basic units: a floating offshore storage and regasification unit (FSRU), a thermoelectric plant (UTE) and the transmission line (TL) to conduct the energy towards the public system. Through burning of natural gas, the project will have an installed capacity of 1,516 MW.

GE Baden is delivering equipment for the steam turbines and generators, engineering and project management services.
