

A-Project:

Atlantic Cocoa Corporation, Côte d'Ivoire

Exporter: JJ Industrial Solutions Schweiz AG, Schaffhausen

Atlantic Cocoa Corporation, Côte d'Ivoire ("ACC-CI") aims to build and operate a modern cocoa transformation plant in San Pedro. The unit is expected to process cocoa beans into semi-finished products (press cake, liquor, butter), with an expected capacity of 64,000 tons per year, extendable to 100,000 t/year. The project supports the Ivorian government objective of locally transforming at least fifty percent (50%) of the country's cocoa production.

For this purpose, a land of 9,5 ha, supporting previously agricultural land, was acquired. It is located in the port town of San Pedro (seat of Bas-Sassandra District and San-Pédro Region) in southwestern Ivory Coast.

ACC-CI aims to be certified ISO 9001, FSC 22000, Rainforest Alliance (RA) and FairTrade (FT). and will develop for this aim an integrated management system similar to the one already in place at ACC's Kribi facility in Cameroon.

The Swiss Exporter is JJ Industrial Solutions Schweiz AG. Equipment from various subcontractors (mainly Bühler Group, Uzwil) will be delivered.
