A-Project: Akademicheskaya 200 MW Combined Heat and Power Plant, Yekaterinburg, Russia

Exporter: Alstom Power

IES-Holding as the largest private energy company in Russia with more than 6% of installed power plant capacity of the country implements a large-scale program for the construction of new generation capacities in 9 regions of the Russian Federation. In the framework of this program the territorial generating company TGC-9 is constructing a new combined Heat and Power Plant in Yekaterinburg. The power plant will supply electrical and thermal energy to a newly developed part of Yekaterinburg.

The Swiss Supplier Alstom Power is providing a GT13 gas turbine for the second phase of the project.
